

PERSONAL INFORMATION	Eleonora Centofante
	 Department of Biology and Biotechnologies Charles Darwin P.le Aldo Moro 5 (CU026), 00185 Rome, Italy
CURRENT POSITION SSD	Ricercatore a tempo determinato di tipo A (RtdA) SSD BIO-18 Genetica
RESEARCH TOPICS / EXPERIENCES	<ul style="list-style-type: none"> • Circuit dynamics and cellular topographical organization in physiological and pathological conditions

EDUCATION AND TRAINING

24/02/2017	PhD in Psychobiology and Psychopharmacology Sapienza University of Rome, Italy
27/03/2013	Master cum laude in Neurobiology Sapienza University of Rome, Italy

WORK EXPERIENCE

8/03/2023- present	Research fellow- RtdA position Dept. of Biology and Biotechnologies Charles Darwin/ Genetic Institute Sapienza University of Rome
21/12/2021-8/03/2023	Research fellow awardee for Horizon Europe Award Dept. of Biology and Biotechnologies Charles Darwin Sapienza University of Rome
1/02/2020-10/10/2021	Postdoctoral research fellow Biophysics Institute- National Research Center (IBF-CNR)
1/06/2018-31/01/2020	Postdoctoral research fellow Center for Research in Neurobiology "D. Bovet" Neuroscience (CRiN) Dept. of Biology and Biotechnologies Charles Darwin Sapienza University of Rome
26/06/2017-28/03/2018	Postdoctoral research fellow Boston Children's Hospital- Harvard Medical School MA, United States

21/01/2014-30/06/2015	Lab manager/ Research assistant Boston Children's Hospital - Harvard Medical School MA, United States
-----------------------	-------------------------------------------------------------------------------------------------------------

OTHER QUALIFICATIONS

07-09/2021	Seminari formativi organizzati dal Centro ricerca e servizi Sperimentazione Preclinica e Benessere Animale Sapienza University of Rome
01/2011	AISAL course "The use of statistics in biomedical research " CERC, Rome
11/2012	FELASA course "Science of laboratory animals" CNR, Rome
01/2017	"3Rs: Scientific aspects and Socio-political implications" GlaxoSmithKline, Rome
07/2012	Summer School of the Giovanni Armenise- Harvard Foundation Harvard Medical School/ Boston Children's Hospital Boston, USA

TEACHING EXPERIENCE

2023- today	Member of the examination board for Communicative processes- Science and Medicine (BIO/18 SPS/02; CFU 12)
2018-2023	Psychobiology and Psychopharmacology practice (M-PSI/02)
2020-2021	Member of the examination board for Techniques of study animal behaviour; Psychobiology; Psychopharmacology and Neurobiology of Memory (M-PSI/02; CFU 6)

FELLOWSHIPS

2021	Horizon Europe Award- Be FOR ERC- Sapienza University
2019	Young investigator grant (Grant di avvio alla Ricerca)- Sapienza University
2018	Travel fellowship from ISDN (International Society for Developmental Neuroscience)

NEUROSCIENCE SOCIETY MEMBERSHIPS

2019-present	Società Italiana di Neuroscienze (SINS), European Brain and Behavioral Society (EBBS), Federation of European Neuroscience (FENS)
--------------	-----------------------------------------------------------------------------------------------------------------------------------

MAIN RESEARCH EXPERIENCE

2023	Research project: Genetic tools to characterize human disease. RtdA position
2021-2022	Research project: Investigation of the role of cortico- striatal circuits in consolidation and retrieval of long-term spatial memory. Sapienza, BE-FOR-ERC Principal Investigator, 50.000€.
2019-2020	Research Project: Mapping neural ensembles activated during spatial navigation. Sapienza, Grant di Avvio alla Ricerca, Postdoc, 2.500€.
2017-2018	Research project: Electrophysiological and behavioural evaluation of an early dietary enrichment on visual cortical development and aging in control mice with particular interest in Parvalbumin positive neurons and Perineuronal nets development (Harvard Medical School) Prof. Puder Mark and Dr. Fagiolini Michela. Postdoc
2013-2017	Research project: Analysis of visual cortical function and circuits in a mouse model of Rett Syndrome. Investigation of visual evoked potential and single unit response in Mecp2 Heterozygous females at the baseline and after a pharmacological treatment and (Le Blanc JJ., et al 2015). Analysis of which circuits are responsible for this impairment. (Harvard Medical School/ Boston Children's Hospital) Prof. Hensch T.K. and Dr. Michela Fagiolini. PhD student.
2011-2013	Research project: Characterization of a mouse model of μ - opioid receptor polymorphism (OPRM1-A118G). More in detail, the goal of my research was to investigate how the presence of this polymorphism could affect social behaviour and stress response during development. (National Research Council) Dr. Francesca D'Amato. Undergraduate student.

ADDITIONAL INFORMATION

Peer-reviewed publications

Centofante E, Fralleoni L, Lupasco C, Migliore M, Rinaldi A, Mele A. Different hippocampal activation pattern following massed or distributed spatial training in mice. Under review Scientific report

Centofante E, Anez-Bustillos L, Baker M, Hodgson N, Hensch TK, Puder M, Fagiolini M. Short term Omega-3 enriched diet prevents the age- dependent loss of parvalbumin positive cells in the visual cortex resulting in an increase of visual acuity. Submitted to Nature Aging
